

The Association for Women in Mathematics
University of Kansas Student Chapter

Everyone is Invited!

Tuesday, November 18, 2014

4:15 PM

306 Snow Hall

**Teaching and Learning at KU: A Conversation with
Andrea Greenhoot**

**Andrea Follmer Greenhoot, Professor of Psychology, Director of the
Center for Teaching Excellence, and Gautt Teaching Scholar at the
University of Kansas**

Andrea Follmer Greenhoot (“Dea”) is Professor of Psychology, Director of the Center for Teaching Excellence and Gautt Teaching Scholar at the University of Kansas. Her research in psychology examines the development of memory for personal experiences, with a special focus on memory in child trauma victims and the connections between memory and well-being. In addition to her memory research, she studies the applications of cognitive and developmental science to questions about teaching and learning in higher education. Supported by grants from the Spencer and Teagle Foundations, her work has examined strategies for enhancing learning and skill development in large courses, for assessing learning, and for using the evidence to improve education. She led the development, evaluation, and scaling-up of KU’s first year seminar program, and currently co-leads a multi-university collaboration on transforming entry-level courses to advance teaching and improve learning in STEM. Dr. Greenhoot is on the executive committee of the Developmental Psychology division of the American Psychological Association, and also has served as a legal consultant on cases involving children’s eyewitness testimony about stressful events.

Pizza will be served!
