Everyone is Invited!

Tuesday, April 26, 2016

4:15 PM

306 Snow Hall

The Future of Predictions and Analytics

Melissa Boudreaux

Fellow of Casualty Actuarial Society (FCAS), Director of General Insurance Software at Actuarial Resources Corporation

Ms. Boudreaux specializes in assimilating leading-edge advances in applied science and mathematics, information technology, and actuarial techniques to deliver deep insight and provide powerful tools to property and liability actuaries and risk managers. Between pricing and reserving positions with insurance companies, actuarial consulting firms, multi-national software developers and start-up consulting and software operations, Ms. Boudreaux has amassed experience in a vast range of disciplines and geographical locations. She also participates in national and regional actuarial organization activities.
